

Sustainability Policy

At Iniala, we care about the environment and advocate for environmentally sound and sustainable practices in our daily operations. Our various environmental and sustainability efforts are core pillars of our business, and we strive to create social and environmental benefits for the surrounding community. We recognise our role in the global tourism industry and are committed to the long-term sustainable management of our activities, actively contributing to the overall sustainable development of the industry.

At Iniala, we emphasise:

- Safeguarding the environment by reducing the environmental impact of our activities and participating in environmental and conservation initiatives.
- Continuously monitoring our environmental performance and setting sound environmental objectives, comparing our performance with our policies, objectives, and targets, with a view to continuous improvement over time.
- Reducing our environmental footprint by conserving energy and water.
- Minimising waste creation and actively reducing, reusing, and recycling.
- Using organic, eco-labelled, fair-trade labelled, local, and/or seasonal products whenever possible.
- Educating our staff and providing regular training on environmental and sustainability practices to meet our objectives.
- Encouraging our guests to participate in our environmental efforts.
- Raising awareness on environmental and sustainability matters with our suppliers, customers, and contractors.
- Fully complying with national and international environmental, labour and Health & Safety legislation.
